21/F., CityPlaza Tower 1,
Taikoo Shing, 1111 King's Road,
Hong Kong
Dear Mr. Lui,

I am writing to express my interest in being a Business Analyst Intern at your place. I am an undergraduate student pursuing a degree in Economics in the Chinese University of Hong Kong. I will be graduating in July 2022. I believe my analytical skills and determination will make me a suitable candidate for this position.

I discovered my interest in data analysis through my first economic project on *"Immigration Trend from HK to Taiwan",* so I spent my spare time self-learning Python and Stata. To further my learning, I took courses in university on machine learning using different methodologies, promoting myself to become qualified for the concentration on data analytics. Upon learning the theories, I am able to apply them in my projects including two machine learning papers on US presidential election results.

Studying economic in CUHK equips me with the fundamental reasonings to analyze individual business and macroeconomies. I understand their importance in creating effective strategies and decisions in the age of volatility. As an economic student, I have always been striving to become one of the pioneers in the world. I believe data analytics will provide me with a convincing and reliable approach to explain my thoughts and ideas, so that I can bring innovation and intelligence to the society.

After years of understanding my goals and aspiration, I am desperate to obtain practical experiences in the real world. I am confident my passion for numbers and data will be a huge advantage at work. Working and learning at your company will definite be a breakthrough in my path. Thank you for your time and consideration, and I am looking forward to hearing from you soon.

Yours Sincerely,
Zack, Yam Tsz Chung
